**DETAILED ACTION*****Priority***

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/278,916, filed on 10/24/02.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 19 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/278,916. Although the conflicting claims are not identical, they are not patentably distinct from each other because the optical scanning apparatus defined in both conflicting claims contains the same structure. Note that "An image forming apparatus" recited in the preamble of claim 19 has been fully considered; however, no patentable weight has been given because the body of the claim only defines an optical scanning apparatus.

Art Unit: 2872

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 19-22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/278,916 in view of Aoki et al. Claim 1 of the copending application defined the same optical scanning apparatus as that of the image forming apparatus recited in claim 19. The difference between claim 19 of the present application and claim 1 of the copending application is that claim 1 of the copending application does not define an image forming apparatus, such as laser printer, facsimile machine or digital copier. However, the use of an optical scanning apparatus in an image forming apparatus, such as laser printer, facsimile machine or digital copier, for forming an image is well known in the art (see Aoki et al, in column 1, lines 9-16). Thus, it would have been obvious to one skilled in the art to use the scanning apparatus of claim 1 for forming an image forming apparatus, such as laser printer, facsimile machine or digital copier, as taught in Aoki et al for forming an image.

This is a provisional obviousness-type double patenting rejection.
